

The Unified Principle of Colour

Contents

List of Figures	xi
Acknowledgements	xiii
Introduction	1
I.1 The challenge	1
I.2 Two analogies	2
I.3 The intent to see	3
I.4 A change of emphasis	4
I.5 A note on my approach	5
I.6 The book's structure	5

PART I

1. The Case of Colour Vision	9
Abstract 1	9
1.1 Basics	10
1.2 The predicament	11
1.3 Incongruence generated by the different cone sets	13
1.4 The deterrent preventing the assimilation of the three views	14
1.5 Brightness relationships	15
1.6 Reaching a common scale of reference	16
1.7 A curious thought!	17
1.8 The path to follow	18

2. Conscious Mind and Non-conscious Mind	19
Abstract 2	19
2.1 Conceptual Consciousness versus Expanded Consciousness	20
2.2 The Conceptual Mind contrasted with the Expanded Mind	21
2.3 Mind	22
2.4 Awareness	23
2.5 A linguistic precision	23
2.6 The expanded mind eludes us	23
3. Resolving Contradiction Through Colour	25
Abstract 3	25
3.1 Seeing 3D	26
3.2 The principle of colour formation	28
3.3 A pause to identify the unified principle of colour	28
3.4 Some conclusions already emerging	29
3.5 Light is colourless	30
3.6 Black and white images	31
3.7 The unseen content	31
3.8 The unsolved issue	32
4. Image Formation	33
Abstract 4	33
4.1 The uncanny moment that enables vision	34
4.2 Forming a visual object	35
4.3 From physical process to image	37
4.4 The duration of a visible image	38
4.5 The moment of integration	38
4.6 Conclusions	39
4.7 Looking ahead	40

5. Colours and Colours Relationships	43
Abstract 5	43
5.1 The colours of the spectrum	44
5.2 Five points already covered	47
5.3 The artist's colour wheel	48
5.4 Green and magenta	50
5.5 Change in brightness versus change in wavelength	51
5.6 Two distinct colour progressions	52
5.7 Complementary colours	53
5.8 Analogue colours on the same half-spectra	54
5.9 Analogue colours on opposing half-spectra	55
5.10 Describing not explaining	56
5.11 Looking ahead	57
6. Coloured Shadows	59
Abstract 6	59
6.1 Coloured shadows	60
6.2 Colour formation in the shadow	61
6.3 The same process active in different phenomena	63
6.4 Looking ahead	64
7. After Images	65
Abstract 7	65
7.1 The brightness reversal	65
7.2 The effect of the reversal on colour	66
7.3 Looking ahead	68

8. Integrating Brightness Ratios from the Three Cone Sets	69
Abstract 8	69
8.1 Three incommensurate black and white views	69
8.2 Resolving incompatible relationships	70
8.3 The magnitude of the task of integration	72
8.4 Complexity resolved by the non-conscious mind	72
8.5 Looking ahead	73
9. A Possible Temporal Factor in Colour Formation	75
Abstract 9	75
9.1 A rapid sequence of views generates the visible image	76
9.2 Creating colours through a rapid sequence of images	77
9.3 The Pulfrich effect	78
9.4 A creative response, not a hidden programme	79
9.5 Looking ahead	80
10. A Second Look at the Binary Structure of Colour	81
Abstract 10	81
10.1 The binary structure of colour	82
10.2 The brightness sequence within the three cone sets	83
10.3 A preconceptual visual process	84
10.4 The overlap at the ends of the half-spectra	85
10.5 Complementary colours produce black	87
10.6 Looking ahead	87
11. Sensory Discernment Beyond Consciousness	89
Abstract 11	89
11.1 The transmutation of imperceptible into perceptible	90
11.2 Three realizations	94
11.3 Becoming an object of perception	94
11.4 Subjectivity	95
11.5 Looking ahead	96

12. Modes of Perceiving and a Touch of Philosophy	97
Abstract 12	97
12.1 Modes of seeing	98
12.2 Considering the implications	100
12.3 The point of view adopted	100
12.4 Is your blue the same blue as my blue?	101
12.5 On how the world works: a digression for the curious	102
13. The Perceiver Wields the Key that Unlocks Colour	105
14. Epilogue	107
14.1 A non-physical influence	107
14.2 What the scientific method omits	109
14.3 Material and non-material presence	111
14.4 In a purposeful world	115
Appendix I—The Chameleon and Our Sense of Self	119
Appendix II—The Undeclared Power of Perception	123
Appendix III—Luminosity Reversal in After-Images	127

PART II

The Benham Top: From Black and White to Colour	143
15. Initial Observations on the Spinning Top	145
Abstract 15	145
15.1 The Benham top	146
15.2 Thinking it through	147
15.3 The initial conditions	148
15.4 A reminder: colour is not wavelength	149
15.5 Equally subjective, equally objective	149
15.6 The spin is not a factor in colour production	150
15.7 A description of the Benham top when spinning	150
15.8 The colour of the arc-segment	152
15.9 Variations between observers	152
15.10 Observer variation due to peripheral effect	153
15.11 Traps that ensnare attempts to understand	155
15.12 A caveat	156
16. The Process of Colour Formation on the Benham Top	157
Abstract 16	157
16.1 Prerequisite information	158
16.2 The approach	159
16.3 Arc segments and the circles they form	160
16.4 The black half-disc as a reset function	161
16.5 Image formation at the arc-segment	161
16.6 Registering stimuli versus seeing an image	162
16.7 Rate of spin	163
16.8 An installed programme or a living being	163
16.9 Colour formation on the Benham top	164
16.10 For curiosity's sake	170
16.11 A parting thought	171
17. Q&A On the Benham Top	173
